

# DHRUBJYOTI CHATTOPADHYAY

QA Engineer | Automation, Manual & API Testing | Azure Cloud | Agile/Scrum  
(+91) 7873337422 | dhrubchattopadhyay.97@gmail.com | GitHub | LinkedIn | X

## SUMMARY

QA Engineer with over 3 years of Software Quality Assurance experience, specializing in Selenium Automation using Java, TestNG, Maven, API Testing, SQL, Git and Jenkins. Experienced in developing and maintaining POM-based automation frameworks, executing Functional, Regression, Sanity, API, and Database Testing, and managing defects in Agile/Scrum environments. Certified Microsoft Azure Administrator (AZ-104), expanding expertise in Azure cloud administration, CI/CD, and modern DevOps practices.

## EXPERIENCE

**Operations Associate | eTeam Infoservices Pvt. Ltd** 2024 – Present  
India

**Uber Eats & Postmates | Client: Uber**

Tools: Java, Selenium WebDriver, TestNG, Maven, Jenkins, Postman, Jira, GitHub

- Automation & CI/CD Execution:** Maintained modular Java-Selenium automation scripts within a POM framework by analyzing SRS documentation to update UI locators and executed automated regression suites via TestNG and Jenkins CI pipelines.
- Manual API & Backend Validation:** Executed manual API tests in Postman against technical documentation, validating HTTP status codes and backend response structures.
- Defect Tracking:** Identified, documented and retested for software defects in Jira with complete reproduction steps and logs, working with development teams to verify fixes during sprint cycles.

**LOADHIVE | Client: Nitro Logistics Inc.**

Tools: Java, Selenium WebDriver, Maven, MySQL, Jira

- Test Execution & Quality Assurance:** Wrote and maintained manual test scenarios, assisted in Java-Selenium automated checks for shipment workflows, reducing regression efforts and keeping releases on schedule.
- Backend Validation & Defect Management:** Conducted backend database verification using targeted SQL queries in MySQL while tracking end-to-end defect lifecycles in Jira to ensure data integrity and stability.

**Manual Test Engineer (Contractual)** 2022 – 2023  
India

**Road Construction & Management Portal | Client: Civil Engineering Department**

Tools: Jira, TestRail, MySQL, Excel

- Executed manual test cases for Functional Testing, maintained regression test suites, and validated backend data using SQL.
- Conducted KT sessions to demonstrate test strategy and workflow for core functionalities.

## KEY ACHIEVEMENTS

- Automation Script Execution & Enhancement:** Enhanced, maintained, and executed 40+ Selenium automation scripts using Java, Selenium WebDriver, TestNG, Maven, and POM, improving automation stability and improving average handling time.
- Defect & Regression Management:** Logged, tracked, and verified 180+ defects using Jira, while executing 100+ regression and functional test cycles across multiple sprint releases.
- API Validation & Quality Assurance:** Validated API responses using Postman, verifying request/response payloads, HTTP status codes, and JSON responses.

## PERSONAL PROJECTS

**FastLogistics Shipment Management:** Built a scalable, data-driven Selenium test framework using the Page Object Model (POM) to automate end-to-end logistics workflows, including authentication, shipment creation, status tracking, and dashboard navigation.

**SauceDemo Automation:** Built a Selenium WebDriver & TestNG framework using the Page Object Model (POM) to automate end-to-end e-commerce workflows, using GitHub for version control.

**Virtual Network Peering & Custom RBAC Role Implementation:** Designed an Azure VNet architecture with secure cross-network peering, and a custom RBAC role to grant access for VM operations.

## SKILLS

**Automation Testing:** Java, Selenium WebDriver, TestNG, Maven, Page Object Model (POM)

**API Testing:** REST API Validation (Postman)

**Tools & Platforms:** Jira, GitHub, Eclipse, TestRail, Chrome DevTools (HTML, CSS)

**Processes & Methodologies:** Agile/Scrum, STLC, SDLC, Bug Lifecycle Management

**Manual Testing:** Functional, Regression, Smoke, Sanity, SIT, UAT, BVA, ECP

**Databases:** MySQL (SQL Queries, Backend Validation)

**CI/CD & Cloud Tools:** Jenkins, GitHub Actions, Microsoft Azure (AZ-104)

## CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate (AZ-104)

Microsoft Certified: Azure Fundamentals (AZ-900)
